

Syed Umair Ali

Dedicated Web Developer with strong problem-solving skills and expertise in modern frontend technologies, seeking roles in **Fullstack Development** and **AI/ML** to build responsive user interfaces and contribute to innovative, data-driven solutions.

Academic Details

**Bachelor of Technology (B.Tech)
Computer Science & Engineering
(AI & ML)**

Khwaja Moinuddin Chishti Language
University, Lucknow
Graduated: 2025 | CGPA: 6.69

Soft Skills

Analytical | Collaborator | Problem solving |
Time Management | Email-writing

Technical Skills

Programming Languages:
JavaScript, Python, SQL

Frameworks:
React Js, Bootstrap, Node Js, Express Js

Core Competencies

- Agile Methodologies
- Software Development Life Cycle
- Debugging
- Web Services
- Performance Optimization

Personal Details

Languages Known: English, Hindi
Address: Budaun, Uttar Pradesh.

Profile Summary

B.Tech graduate in Computer Science & Engineering (AI & ML) with hands-on experience in **6+ projects** across full stack development and AI/ML. Skilled in **JavaScript, React, Node.js, Python, Flask**, and **CNN-based image recognition**. Built projects like a **Plant Disease Detection System**, a **Positive News Web App**, and a **Movie Fan Page** with dynamic features. Adept at building responsive, data-driven applications and collaborating in agile environments. Currently seeking opportunities in **Full Stack Development** or **AI/ML Engineering** to apply technical skills in real-world solutions.

Work Experience

Web-Development Intern
MOTION CUT, LUCKNOW (remote)
Responsibilities:

- Developed and deployed three interactive web projects using **React, HTML, CSS, and JavaScript**.
- Built a personal portfolio website with integrated contact form and Dynamic Content loading.
- Created a **Movie Fan Page** with embedded YouTube trailers and dynamic quote features
- Designed a **Cricket Star Showcase** platform profiling iconic cricket players.

September 2024 – October 2024

Edunet Foundation with (Microsoft, SAP & AICTE)
Bengaluru, Karnataka (remote)
Responsibilities:

- Developed a Plant Disease Detection System using **Convolutional Neural Network** for image recognition.
- Delivered actionable insights for farmers by detecting plant diseases and recommending Treatments.

December 2024 – February 2025

Infosys Springboard Internship (remote)
AI Intern – Ambient Email Agent Development

- Built an autonomous Ambient Email Assistant using **LangGraph and Google Gemini**, enabling intelligent email triage, contextual understanding, and action execution (ignore, notify, respond).
- Designed a multi-node, stateful workflow incorporating **ReAct reasoning, tool integration, and Human-in-the-Loop (HITL) checkpoints** to ensure safe and controlled automation.
- Developed a custom evaluation pipeline with human-labeled datasets to measure intent accuracy, perform error analysis, and improve decision quality.
- Implemented persistent memory and LangSmith observability for adaptive behavior, transparent reasoning, and secure version-controlled deployment using Git and GitHub.

November 2025 – February 2026

Academic Projects

Dr. Crop Ai
Tools: **HTML, CSS, JAVASCRIPT** & for back-end: **Flask** and use of **CNN** for image recognition tasks.
PROJECT-DESCRIPTION: Dr Crop Ai
The Dr.Crop Ai Detects crop diseases from a photo using convolutional neural networks for image recognition tasks. and finds the best preventive way to protect the crop, and then recommends the best pesticides for treatment.
